

ACTION RECOVERY: BRAIN INJURY (BI) SERVICES

Our supportive team works together to provide specialized services to individuals with brain injury. Our services are best utilized by individuals who require a supervised and structured environment and will actively engage in behavioral health and/or addiction supports. Services ensure an integrated model focusing on physical and behavioral health. Visiting specialists, including a licensed nutritionist, occupational/speech/physical therapists, and primary care physicians can offer options to promote holistic health. Services include:

Assessments

- Strength-based
- Establish daily routine and schedule

Residential Habilitation

- 24/7 support available
- Individual 1:1 support as needed
- Settings with a maximum capacity of 8 residents
- Medication administration and activities of daily living assistance

Structured Day

- Available up to 8 hours a day
- Develop/maintain independent living skills
- Individualized supports for social, cognitive, and recreational skill building

Vocational/Employment/Education

- Job coaching
- Volunteer and paid positions available
- Tutoring

Community Integration

- Develop social connections
- Use of community resources
- Transportation provided

New Vitae has established services in compliance with CARF standards to ensure a high standard of personalized care.
